

Swish Recurring

Bank transfer

Swish Recurring lets merchants automatically bill Swedish subscribers in SEK after a quick, one-time setup. The customer authorizes the recurring payment agreement just once in the Swish app using BankID – either by scanning a QR code, tapping a link, or responding to a push notification. From then on, all future subscription payments are collected automatically without requiring any further action from the customer.

Why Swish Recurring?

Sweden's leading mobile wallet, now with recurring billing, not just one-off payments

Lets merchants bill subscribers on the payment method consumers already prefer

No need to push customers onto a card or direct debit for renewals

How it works?
