# Paysafecard

#### **paysafe**card

#### Prepaid voucher

Launched in 2000, paysafecard is a prepaid card designed to enable e-commerce payments, independent of bank account, credit card, or other personal details thereby ensuring consumers can remain anonymous. paysafecard is a very convenient payment option for consumers, operating a dense distribution network, with over 650,000 points of sale across more than 52 countries. With the search feature on the paysafecard site or the app, consumers can find the nearest sales outlet quickly and easily and then pay for e-commerce purchases by entering the 16-digit PIN at checkout.

### How it works?

## Why Paysafecard?

Paysafe report that its consumers spend more than US\$120 billion each year.

According to paysafecard, 35% of EU citizens do not have a credit card; every consumer who pays with paysafecard is an additional customer that merchants would not be able to reach through other non-cash payment methods.

Merchants can access new consumer markets and increase conversion rates with a risk-free, no chargeback payment method that is used by more than 12 million consumers.
